# /* Configuring **TRRC server** */

- There are free open source implementation of turbo cache server
- https://github.com/ducktors/turborepo-remote-cache

- They have docker image and helm charts
- It can be configured to use S3, GCP bucket, Azure Blob Storage…

- There is gh-action to configure and use to cache builds:
  https://github.com/trappar/turborepo-remote-cache-gh-action
